

Name _____ Hour _____ Course _____

Directions:

Re-create each clasp from wire. Some wire clasps require altering with a hammer. Tape down your clasps in the box to the right.

Tools:

Round-nose, wire-nose, flat-nose pliers, wire crimping pliers, a planishing hammer, and bench block.

Definition	Example	Tape Wire Clasp Here
<p>S-Hook</p> <p>This first clasp is an S-hook. I have the S backwards in this picture, but you can still see the backwards S. This hook works with one or two jump rings. In the picture is an oval ring, but a round ring is also perfect.</p>		
<p>Swan</p> <p>This is another popular and strong clasp. This one becomes really strong when you hammer the round ends on both sides.</p>		
<p>Hook</p> <p>This is a big hook. This one can also work with a jump ring on both sides</p>		
<p>J-Hook</p> <p>This one is a J-hook. Not a big mystery why it's called a J-hook. This one also works with one or two rings.</p>		
<p>Curly-J</p> <p>I call this one to the left a curly-J. This is just my name for it. It needs a larger ring for attaching because the curly part needs to fit through the ring.</p>		
<p>Hook & Eye</p> <p>This is a wrapped hook and eye clasp. It's also called an Egyptian clasp. It's very strong.</p>		
<p>Wrapped Hook</p> <p>This is another wrapped hook that will work with any jump ring or wrapped loop.</p>		

Name _____ Hour _____ Course _____

<p>Saxon Spiral</p> <p>Hook and eye clasps in double spiral formation</p>		

Mark the box that describes your work.

Rubric	Technique	Quality / Precision	Work Ethic
4	Work <u>totally matches</u> the examples and technique of bending wire is <u>excellent</u> .	Work is of excellent quality. No uneven bends in wire.	Worked very hard towards finishing all clasps each day, all day.
3	Work <u>mostly matches</u> the examples and technique of bending wire is <u>acceptable</u> .	Work is proficient in quality. Limited uneven bends in wire.	Worked each day to finish clasps.
2	Work <u>partially matches</u> the examples and technique of bending wire is <u>developing</u> .	Work's quality is basic. Some uneven bends in wire.	Worked part of the time. Work is turned in late.
1	Work <u>does not match</u> the examples and technique of bending wire is <u>poor</u> .	Work's quality is poor. Many uneven bends in wire.	Work time was wasted. Work is not complete
0	Did not work	Did not work	Did not work
